Minnesota Pollution Control Agency

May 4, 1988

Ms. Amy Donahoe
ALLIGNED FIBER COMPOSITES
Highway 52 South
Chatfield, MN 55923

Dear Applicant:

Thank you for your renewal application for an NPDES/State Disposal System permit. The application has been assigned permit number MN0048801. The purpose of this letter is to acknowledge receipt of your application, and is not a notification of its completeness nor a statement of compliance with existing permit conditions. If there is a need for more information, we will contact you.

Continuing to use an expired permit beyond its expiration date is covered by the following conditions as stated in Minnesota Rules Part 7001.0160 (Continuation of an Expired Permit):

A person who holds an expired permit and who has submitted a timely and complete application for reissuance of the permit may continue to conduct the permitted activity until the Agency takes final action on the application if the Director determines that both of the following are true:

- A. the Permittee is in compliance with the terms and conditions of the expired permit;
- B. and the Agency, through no fault of the Permittee, has not taken final action on the application date of the permit.

You are required to continue operating under the terms of your existing permit until either your new permit is issued or you are notified that your existing permit has expired and will not be reissued.

The staff person who has been assigned to review your application and other pertinent material is Larry Johnson who may be contacted at (612) 296-7366 if you have any questions.

Sincerely,

Douglas A. Hall, Supervisor
Permits Unit
Regulatory Compliance Section
Division of Water Quality
